RANs

Open Air Interface

OpenAirInteface For our testing it was used the tag 2023.w50.

How to Build

- UHD Build Instructions
- OAI Build Instructions(No E2Agent)
- OAI Build Instructions(Flexric)

Build with Flexric

In this setup we have used oai built with the --build-e2 flag.

```
## 0.1 Building Swig
$ git clone https://github.com/swig/swig.git && cd swig
$ git checkout release-4.1
$ ./autogen.sh
$ ./configure --prefix=/usr/
$ make -j12
$ sudo make install
## 0.2 Required dependencies
$ sudo apt install libsctp-dev python3 cmake-curses-gui libpcre2-dev
## 1. Building OAI
$ git clone https://gitlab.eurecom.fr/oai/openairinterface5g oai
$ cd oai
$ git checkout 2023.w50
$ ./build_oai -w USRP --gNB --nrUE --build-e2 --ninja
## 2. Building Flexric
$ cd oai/openair2/E2AP/flexric
$ mkdir build && cd build
$ cmake -D CMAKE_C_COMPILER=gcc-10 -D CMAKE_CXX_COMPILER=g++-10 ..
$ make -j8
$ sudo make install
```
